Devin Stone

Learner.   Full Stack Developer.   Creator.

PROJECTS

Bubble Trouble

An addictive game built for mobile - pop as many bubbles as you can before the timer runs out! Built using Unity, C#, and Xcode.

BounceAround

Plan the itinerary for your upcoming trip using a map of local restaurants/attractions. Built with Node.js, Express, PostgreSQL, Bootstrap, OAuth, and Google APIs.

Candidate Watch 2016

Get a side-by-side comparison of the social media and news coverage of your presidential candidates and your congress members. Built with JavaScript, jQuery, custom CSS, Facebook and Twitter embedding, and several news APIs.

See these and more at www.devstone.tech.
